

a NORTEK company

Project Name	Released By	SW Build Numbers	Release Date
C2-8000	Richard Mallett	432	22nd March 2013
Release Description			
This release adds improved 3D resolution input handling, and also adds higher quality Still Image Store features.			
Release Type			
<i>Full release</i>			
Release Notes valid from release date:			
<i>22nd March 2013</i>			
New Features Included In Release			
Changes since version 425: Added many new 3D resolutions to resolution table. Added ability to decode Vendor Specific Infoframe data to detect 3D input type. New menu item 'Extract 3D' in 'Adjust windows' menu will extract either the Left or Right image. Added auto-detect RGB/YUV for HDMI Sources. Changed Still Image Store to give enhanced resolution - please use the new CORIOtools Suite for this feature.			
Defects Resolved With This Release			
Changes since version 425: Corrected field-swap issue for 1080i HDMI sources. Fixed issue where OUT1 / OUT2 did not show correct resolution.			
Installation Instructions			
Download and run the executable file. This will install to C:\Program Files\CORIO2. Run the firmware upgrader. Connect an RS232 cable from your PC to the unit. Select the correct COM port on the software and click Update.
