Feb 2017 CORIOcontrol v1.2.11.0

Released by: David Reynaga

New

You can now:

- Export, import, back up, and restore the configuration of your C2 device using API version 46. Your configuration includes all your settings, presets, stills, logos, custom resolutions, and EDIDs.

Fixed

- Download and installation is easier, as the application uses an updated digital signature with latest security.

Notes

- If running firmware earlier than 517, CORIOcontrol will prompt you to upgrade.
- Stills and Logos only show a preview when uploaded or manually downloaded.
